PROFESSIONAL SUMMARY

Motivated Computer Science and Engineering undergraduate with strong foundations in full-stack development, object-oriented programming, and machine learning concepts. Proficient in building responsive web applications using React and JavaScript, with hands-on experience in Python-based NLP projects. Completed industry-recognised certifications in AI, Java, and Python. Seeking a software engineering internship to apply technical skills and contribute to impactful real-world projects.

TECHNICAL SKILLS

- Programming Languages:** C, C++, Java, Python
- Web Technologies:** HTML5, CSS3, JavaScript (ES6+), React.js
- Databases:** MySQL, MongoDB (Basic)
- Tools & Platforms:** Git, GitHub, VS Code, Postman, Figma, Vite
- Concepts:** Object-Oriented Programming, RESTful APIs, NLP, UI/UX Design, Agile Basics
- Coding Profiles:** LeetCode: harinimurugesan__ | CodeChef: kit28csb051 | HackerRank: murugesanharini1

EDUCATION

Bachelor of Engineering – Computer Science and Engineering	2024 – 2028
Kalaingar Karunanidhi Institute of Technology, Coimbatore CGPA: 8.17 / 10.0	
Higher Secondary Certificate (HSC) – Science Stream	2023
Carmel Garden Matriculation Higher Secondary School, Coimbatore Percentage: 82%	
Secondary School Leaving Certificate (SSLC)	2021
Krishna Swamy Nagar Ganga Nagar Matriculation School Percentage: 89%	

PROJECTS

Query Management System	React · JavaScript · HTML · CSS · Vite
- Designed and developed a full-stack e-commerce query management system supporting order tracking, status updates, and query resolution workflows. - Built modular, reusable React UI components and an admin dashboard with role-based views, improving system usability. - Implemented responsive layouts ensuring cross-device compatibility for both desktop and mobile users.	
Grammar Checker Application	Python · spaCy · Regex · LanguageTool API
- Developed an automated grammar checking tool leveraging Natural Language Processing (NLP) and rule-based validation for real-time error detection. - Integrated the LanguageTool API and spaCy library to identify grammatical errors, suggest corrections, and highlight sentence-level issues. - Applied Regex-based preprocessing to clean and normalise text input before analysis, increasing detection accuracy.	

TRAINING & WORKSHOPS

Full Stack Development Training

KIT College of Engineering

- Completed comprehensive training covering frontend (HTML, CSS, JavaScript, React), backend development, and database management with MySQL.

UI/UX Design Training

Maiyyam

- Gained hands-on experience in wireframing, prototyping, and user-centred design using Figma, following industry UX best practices.

CERTIFICATIONS

- Infosys – Artificial Intelligence Foundation Certification
- Infosys – Java Foundation Certification
- Cisco Networking Academy – C++ Essentials & Python Essentials
- Google – Get Started with Python (Google Career Certificates)
- NVIDIA – Applications of Artificial Intelligence for Anomaly Detection

EXTRACURRICULAR ACTIVITIES

- Participated in national-level hackathons and coding competitions focused on problem-solving, software development, and innovation.
- Attended AI and chatbot development workshops, gaining practical exposure to conversational AI and emerging technologies.
- Presented technical research papers at department-level events, strengthening technical writing and communication skills.

DECLARATION

I hereby declare that the information provided above is true and correct to the best of my knowledge and belief.
